Projects

Project Name: Dockshow
- **Tech-Stack: HTML | CSS | Javascript | Angular | Ionic | Nodejs | Mysql | Sequalize**
- **Description :** There are 4 user roles management. The Physician can work on multiple locations with calendar booking schedule, site admit can add Adding/Inviting New Physicians & Location Allocation. Here we manage multiple location management, Appointment Management and rewards management for physician & site admin.

- **Project Name: Shiksha App**
- **Tech-Stack: HTML | CSS | Javascript | Angular | Nodejs | Mysql | Sequalize**
- **Description :** This is a platform where Schools, Colleges, Coaching institutes & Extracurricular Activities will list them selfs and show their details. On other side, students and parents can apply for the admissions. The ExtraCurricular Activities (ECA) will also list themselves and offer their services to the users. This website will going to solve the problem of finding near by schools, colleges, Coaching institutes as well as ECA. And also user can submit the admission forms to the multiple school in a single time and appear into the interview. This will be a easy and useful application to the users.

- **Project Name: FAQ & Accordion App**
- **Tech-Stack: Html,php,Shopify rest api /graph sql**
- **Description :** With this Accordion App, clients unlock the potential to generate an unlimited number of FAQs effortlessly, with the flexibility to assign them to any desired page within their Shopify store. One of the standout features is the ability to customize accordion styles, offering a range of design options to suit diverse preferences. We've curated a variety of visually appealing accordion designs, allowing clients to choose the perfect style that seamlessly integrates with their store's aesthetics.

- **Project Name: Festival Season App**
- **Tech-Stack: Html,php,Shopify rest api /graph sql**
- **Description :** About Super Festival Seasons, Let's give the perfect festive look n feel on this Christmas to store. With this app, users can easily customize the appearance of their store to capture the essence of the holiday season. Notably, one of the standout features is the ability to select from a variety of snow effects, all conveniently accessible through the app's user-friendly dashboard.

- **Project Name: Chat via Facebook Messenger**
- **Tech-Stack: Html,php,Shopify rest api /graph sql**
- **Description :** I successfully developed a Shopify app that seamlessly integrates with Facebook Messenger, offering an efficient and personalized customer communication solution for online store owners. This app empowers store owners to optimize their customer support and engagement by providing the flexibility to position the chat messenger icon precisely where they prefer on their website. With customizable placement options such as bottom left, bottom right, center left, center right, and center, store owners can tailor their customer interaction experience to suit their website's design and user flow. Additionally, my app allows for effortless color customization of the chat messenger icon, enabling store owners to harmonize the icon with their website's color scheme or branding, ensuring a cohesive and visually appealing customer experience.

- **Project Name: Wordpress Plugin for Shipping Calculator**
- **Tech-Stack: Wordpress,Plugin,Php , jquery,html**
- **Description :** I've designed and devloped a plugin catering to the client's needs, allowing them to effectively oversee shipping during the checkout process. In accordance with the client's specifications, I've implemented a feature in the admin panel that grants the ability to restrict certain dates. This empowers the client to ensure guaranteed shipping on specific days, such as excluding Saturdays and Sundays.

- **Project Name: Streamlining WordPress Development with a Custom Git Repo**
- **Tech-Stack: Wordpress,Plugin,Php , jquery,html**
- **Description :** Designed and developed a customized Git repository to enhance WordPress development workflow. Automated WordPress installations, theme deployment, and plugin management, reducing setup time and improving efficiency. Implemented a version control system for WordPress core, themes, and plugins, enabling easy updates and maintenance. Ensured project consistency by using the custom Git repository for WordPress installations, theme deployment, and plugin installations. Effectively managed WordPress updates, theme updates, and plugin updates, keeping projects up-to-date with the latest features and security patches.

Project Name: Vechain Energy
- **Tech-Stack: React-Js,Ant Design**
- **Description :** Vechain Energy Single page static website. For the development i have used React Js and Ant Design.
